How To Maintain Healthy Hair

1. Drink plenty of water, your hair, skin and nails are a reflection of your diet.
2. Sleep with a silk or satin scarf or pillow case to prevent breakage.
3. Change your shampoo & conditioner every six months.
4. Consult your hair professional concerning the PH balance and hair type.
- *5. Your hair should be routinely trimmed every 8 weeks.
- *6. Deep condition or hot oil treatment regularly
7. With braids or locks, touchups are mandatory
8. Do your product research carefully.
9. You should not use petroleum based products in your hair.
10. Remember positive in, positive out. It all effects your hair.

*There are exceptions!!!!
