Hair Care Guide

To maintain the look and quality of your Dreamgirls hair, please follow the simple instructions below. A copy of this Hair Care Guide is included with every purchase.

Shampoo/Conditioner

Wash and condition your hair with a rich moisturizing shampoo and conditioner. We recommend using moisturizing shampoo and conditioner for normal to dry hair. Brush and detangle hair before applying shampoo. When washing and conditioning your Remi hair, do not tussle or pile the hair on top of your head - this creates tangles. Instead gently shampoo and condition the hair rubbing in one direction only. Rinse thoroughly to prevent product build-up which can lead to tangling.

Deep Condition

To keep your hair in tip top shape, use a simple deep conditioner or hot oil treatment in your hair about once every two weeks. More or less, depending on what products, chemicals or styling methods you apply to your hair.

Style

The greatest advantage of 100% human virgin remy hair is you can style it like you would normally do your own hair. Unlike the so-called

"human hair" sold in the beauty supply, Dreamgirls hair is REAL 100%, unprocessed human virgin hair. This means that just like your hair, you can dye, perm or bleach Dreamgirls hair to achieve your color of choice, and can comb, brush, curl with a curling iron or straighten with a flat iron to get the style you want.

Do's and Don'ts

DO - Sleep with your hair tied up, in a braid or bun for example.

DO - Comb out thoroughly before shampooing.

DO - Gently shampoo the hair in one direction only.

DO - Support your attachment when brushing or combing your hair.

DO - Use a good vent brush.

DO - Use a shampoo and conditioner made for dry hair

DO NOT - Sleep with your hair wet. Virgin hair care and remy hair care is not difficult, but requires care.
