Benjamin O. Davis, Jr., son of this country's first Black General, shared more than just a name with his father. Born in 1912, he entered the West Point Military Academy in 1932. He endured much discrimination and various injustices, the least of which not being a "code of silence", where none of his co-cadets and many of his instructors would speak directly to him. However, he persevered and graduated 35th in his class in 1936. The 99th Pursuit Squadron, the first all Black flying unit was created in 1941. Davis, Jr. earned his wings in 1943 thus becoming the first Black Military Pilot and assumed command of the 99th, which was based at Tuskegee Air Field. In 1943, at the rank of Lt. Colonel, he met with a Pentagon review board and personally stopped a recommendation to dissolve the 99th and prohibit all future Black squadrons from combat duty, thereby securing the role of Blacks in the Army Air Corps. His inspiring commands were highly instrumental in proving that combat performance could not be judged on race. **He was promoted to Brigadier General in 1954, becoming the Air Force's first Black General.**

She Flew Amongst The Stars!

Present

Mae Jemison
Born: October 17, 1956
Contribution: Military
