What Is Remy Hair?

Human Hair Is Not All The Same.

Remy Hair is composed of premium young 100% natural human hair. Each strand of Remy Hair is specially treated with the latest technology to smooth the cuticles in one direction, creating less tangling and clumping. Remy hair is strictly reserved for those who demand only the highest quality and is usually from one donor. So the texture and color of the hair is the same.

What's The Best Human Hair?

Everyone has their own opinion of the term "best". The most desirable in the world is 100% raw virgin Human Hair. This hair is valuable, most costly and often times difficult to find. In 100% raw virgin human hair, the hair is healthy, beautiful, youthful and thick. Every single strand is even in color and texture. You can tell by the way it feels and the shine it gives, like a child's hair.

What Is The Difference Between Synthetic Hair and Human Hair?

Synthetic is easy to maintain less expensive than human hair, easy to style and pre-styled. Human Hair is much more versatile, has longer durability, you can have it custom styled and coloring can be applied.

Some people are allergic to synthetic hair because it is a mixture of animal and or synthetic products. Others find that human hair is very expensive and prefer the synthetic hair for that reason. However, if you do the math it's about the same cost at the end of the year, whether you invest a little bit at a time or buy the best human hair that fits comfortably into your price range.
